

Are You on Track to Meet Your Energy and Sustainability Goals?

Environmental, social, and governance (ESG) disclosure requirements and corporate goals have made energy efficiency and greenhouse gas (GHG) emission reductions a priority, driving the need to take action and report on progress.

Abound™ Net Zero Management provides a way to view a building portfolios' performance and drill down into individual building metrics:

- Track and analyze energy use and benchmark across other buildings
- Make energy and emissions data readily accessible to key stakeholders
- Proactively identify conservation measures
- Reduce the risk of noncompliance

Automatically compare building energy usage across your entire portfolio

About Net Zero Management is Rich with Features

Measure

- ✓ Collect utility billing data automatically
- ✓ Easily integrate submeter data to get in-depth insights into usage and demand
- ✓ Calculate GHG emissions based on regional emission factors

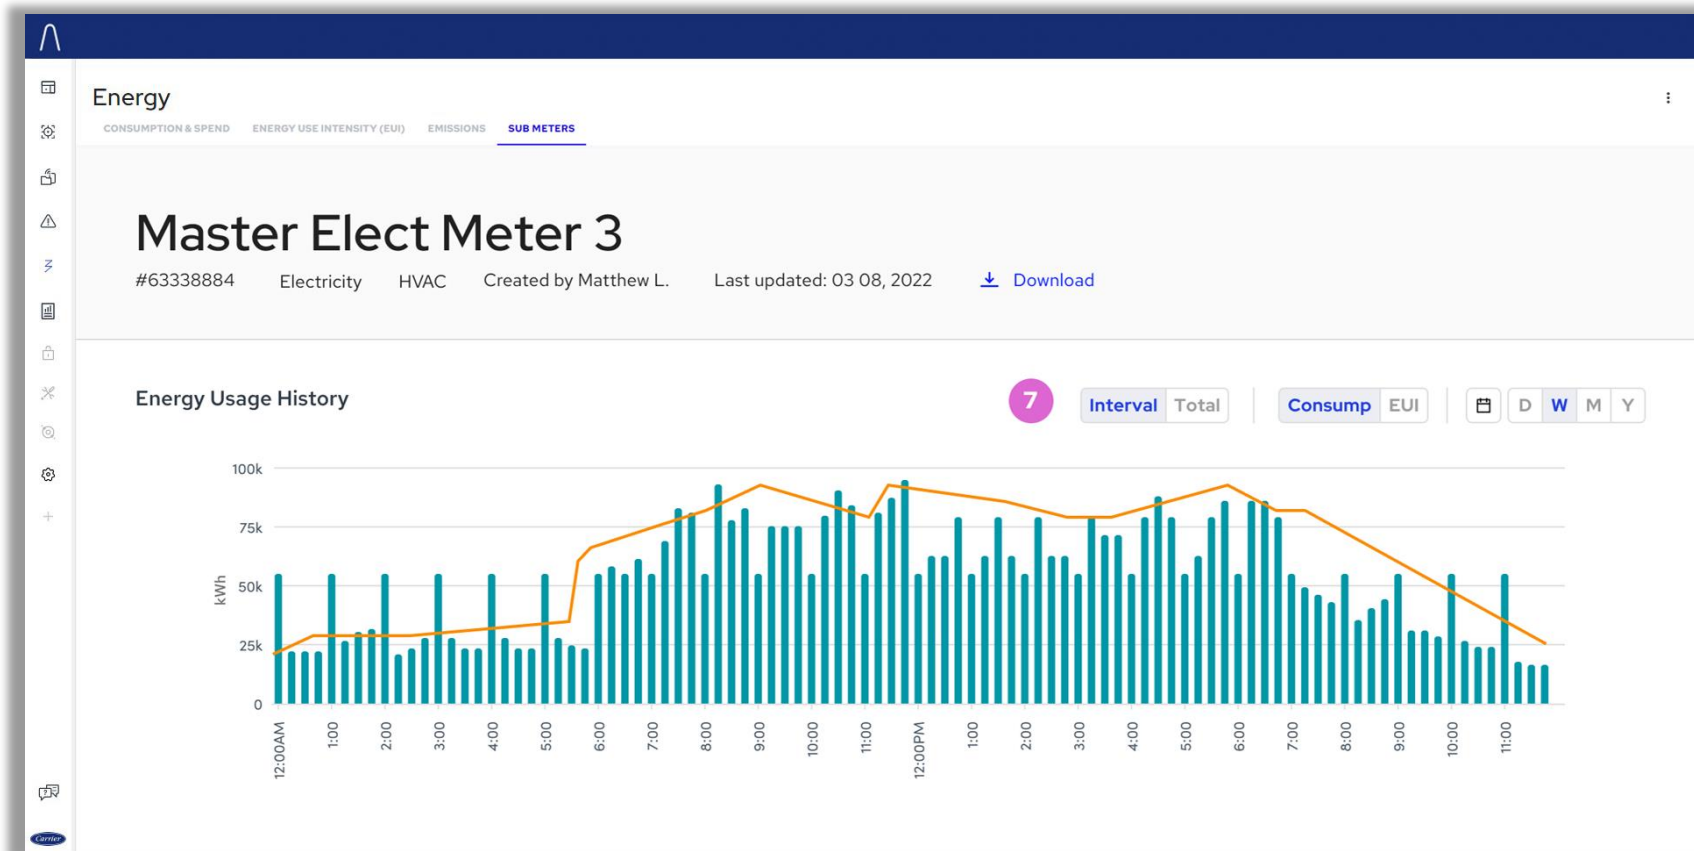

Evaluate

- ✓ Accurately report on energy consumption, spend, and **Scope 1 & 2 GHG emissions²**
- ✓ Identify underperforming equipment or buildings
- ✓ Compare benchmarks across buildings in one central platform

Scope 1: Direct emissions from sources controlled or owned by an organization (e.g. fuel combustion in boilers and furnaces)

Scope 2: Indirect emissions associated with purchase, and subsequent usage, of electricity, steam, heat, or cooling

Charts and data can be downloaded as PDF or CSV files

Take Action

- ✓ Share energy and emissions data across roles and departments within your organization
- ✓ Download data and graphs to ensure consistent and timely submissions of critical data to auditing authorities
- ✓ Prioritize specific energy and carbon reduction measures
- ✓ Fix operational issues such as inefficient scheduling

We can help you reach your energy and sustainability goals with Abound Net Zero Management. Contact us at the website or email below today!
