

CHILLER PLANT ENERGY AUDIT

Understand your chiller operations & incorporate customized improvement measures

In order to improve your chiller plant's efficiency, establishing its existing performance baseline against its design and best-in-class performance is crucial. Carrier Commercial Service can conduct an onsite health check and present an audit report, which includes:

Energy conservation measures incorporate controls and system operations optimization to improve overall plant efficiency. We provide innovative solutions to maximize overall building efficiency while providing a strong return on investment.

ENERGY EFFICIENCY

OPERATIONAL EFFICIENCY

ENVIRONMENTAL EFFICIENCY

With our expertise, achieve benefits and positive impacts in net earnings, key performance indicators and corporate social responsibility, based on your chiller plant requirements and sustainability goals.
